Profile on LinkedIn

@iDiscoveryInc

As an Engagement Manager, Cody assists with the setup of conflicts checks and engagement letters for new matters, tracks the progress of matters through iDS' various service lines, and once completed, helps guide the matter through data disposition and closure.

Engagement Managers serve externally as client liaisons and internally as project managers, overlapping both duties regularly to communicate client needs to iDS resources and to provide project status updates to clients as requested.

Cody was born and raised in Southern California where he currently resides with his two cats, Happy and Ash. In his free time, Cody enjoys wood carving, writing, and travelling.
