SANGEETHA RAMAMURTHY

Sr. Consultant, Discovery Services

Sangeetha, a certified PMP®, is a Sr. Consultant for iDS. She has extensive experience assisting clients and managing projects involving eDiscovery, records management, and databases.

Sangeetha has performed complex data analysis, implemented efficient workflows on best practices for data processing, document review, productions, and advanced analytics on many rapidly paced and large scale domestic and international matters. She also regularly conducts training and demonstrations of Relativity for clients.

Prior to joining iDS, Sangeetha was an Assistant Manager/Sr. Associate at Deloitte Discovery, where she collaborated with general counsel, outside counsel, and third-party service providers to develop and implement eDiscovery procedures.

SELECT EXPERIENCE

- Manages electronic discovery projects involving corporate investigations and litigations from the planning stage through production.
- Liaises with multiple stakeholders to support a portfolio of active engagements, organizing resources to support client needs throughout the EDRM project lifecycle.
- Implements Relativity Assisted Review (RAR), Continuous Active Learning (CAL), Structured Analytics (Email Threading/Near Duplication/Clustering), and Systran Language Translation to help automate and expedite review processes.
- Assisted in creating and optimizing custom scripts to automate processes and reduce manual effort.
- At Deloitte Discovery, managed and handled large scale document reviews of up to 15M records utilizing text categorization, custom global deduplication, email threading and near duplication.
- At Deloitte Discovery, managed a large-scale FCPA investigation that required coordination of services from outside counsel, a document review team, and an operations team utilizing text categorization and predictive analytics
- Implemented customized discovery requests, including witness kits and topic binders, and provided complex reports for a variety of tasks using Relativity and SQL Server.
