Profile on LinkedIn

@iDiscoveryInc

Before joining iDS, Nitin developed his expertise in network administration, security administration, and hardware/software troubleshooting. He's led a team of technicians performing on-site and remote installations, implementations, maintenance, and troubleshooting for Microsoft Windows, macOS, desktop applications, collaboration tools, shared drives, email, and other technologies. His leadership has also supported Microsoft Office 365 and Active Directory products.

At iDS, Nitin safeguards client computer systems, servers, and data security systems. He is responsible for the upkeep, configuration, and reliable operation of client computer systems, servers, and data security systems. He provides solutions that ensure internal IT structures remain up to date for greater productivity as per company policies and procedures.

Born in India, raised in Baltimore, and always on the hunt for his next favorite meal, Nitin lives for family, food, and film. Whether he's exploring new restaurants with his wife or catching a movie with his kids, he brings passion to every moment.

EDUCATION

- BA, Virginia Tech
- CompTIA A+, Network+, Security+ certifications

"When we are saying this cannot be accomplished, this cannot be done, then we are short-changing ourselves. My brain, it cannot process failure. It will not process failure. Because if I have to sit there and face myself and tell myself, 'You are a failure,' I think that is almost worse than dying." – Kobe Bryant
