Profile on LinkedIn

@iDiscoveryInc

Daniel Watson is a highly analytical and detail-oriented technical leader with over eleven years of experience in managing highly effective technical teams, infrastructure design, and secure data management, with a specialization in eDiscovery. He is adept at gathering requirements, designing architecture, and building out scalable and secure environments, ensuring seamless integration with enterprise eDiscovery workflows.

With proven expertise in developing and managing high-performing technical teams, Daniel focuses on innovation, process improvement, and optimizing infrastructure for efficiency and security. His ability to identify business and technical needs, translate them into robust architectural designs, and oversee end-to-end implementation makes him a key contributor in driving strategic technical initiatives.

Daniel is passionate about leveraging technology to enhance operational effectiveness, with a track record of delivering high-performance environments that meet strict compliance, security, and regulatory requirements. He excels at collaborating with cross-functional stakeholders to align technical solutions with business objectives, all while maintaining the highest standards of performance, scalability, and security.
