Mr. Robert Kirtley is the Director of Cybersecurity and Information Governance for iDiscovery Solutions (iDS) in Washington D.C.

Robert has over 25 years of management consulting experience with a focus on providing strategy, operations, and technology infrastructure services in the areas of compliance, information governance, and security. Prior to joining iDS, Robert spent twelve years with Deloitte Consulting, ten years with Duff & Phelps and four years with his own firm, creating consulting practices that centered on serving legal-oriented organizations, including law firms and corporate and government legal and compliance departments. As an instructor for the SANS Institute, Robert has taught more than 1,000 students both deeply technical and managerial courses covering cybersecurity and information management. Robert has also worked with several organizations to design and implement controls to facilitate achieving either certifications such as ISO 27001 or to document compliance with SOX 404 controls and System & Organization Controls (SOC).

Robert leads iDS's efforts to provide management consulting projects for corporations and law firms. In addition to our broader consulting services, he is responsible for our firm's Information Strategy and Governance Practice. He has managed hundreds of client engagements, including long term, large-scale projects for clients with teams ranging from 2 people to more than 100. Robert has also worked with clients to plan and execute incident response efforts in the event of a suspected data breach or system compromise.

He is a frequent speaker on cybersecurity and has written a number of articles on cybersecurity issues specifically dealing with topics within the legal space.

SELECT CONSULTING/MANAGEMENT EXPERIENCE

- Developed and in the process of implementation of a global information governance program for a publicly-traded US software firm. Focused on risk identification and mitigation for the firm. North American implementation is mostly complete, with Asia in process and UK/EU/Middle East/Africa coming up.
- Designed and developed an information governance program for a global retailer, defining data security and data privacy requirements for its U.S., European/U.K., and Asian operations
- Worked with a leading global publisher to perform an assessment of its information security program, identifying vulnerabilities and developing both short and long-term plans for remediation of issues
- Evaluated cybersecurity measures in place for a global company to assess whether it had taken reasonable measures to protect its intellectual property in a matter before the International Trade Commission.
- Designed and implemented a data security and privacy program for a leading pharmaceutical firm that addressed both internal employee and subcontractor requirements. Identified requirements and implemented a program to comply with HIPPAA/PHI and customer data privacy needs
- Assisted a legal professional services firm with incident response related to a network intrusion. Conducted a forensic investigation to determine the extent of the data intrusion and confirmed that there was no reportable data breach
- Led a project to develop and implement an information management program for a leading public utility. Data privacy requirements for employees and customers were a key element of the program
- Conducted forensic work with an international technology firm that had a data breach to identify and document which systems, clients, and data sets were compromised. Coordinated the design and development of a remediation and information security program to improve future security posture and reduce the risk of future breaches

EDUCATION & CERTIFICATIONS

- Masters of Business Administration in Finance with a concentration in Strategic Management, Wharton School at the University of Pennsylvania, 1992
- Bachelor of Science in Finance, University of Minnesota Carlson School, 1986
- GSLC – GIAC Security Leadership Certification
- GSEC – GIAC Security Essentials Certification
- U.S. Department of Defense Directive 8140 – Information Assurance, Level II certification for technical data security
- U.S. Department of Defense Directive 8140 – Information Assurance, Level III certification for information management
